GUS

In over the next two years, the plan builds upon our ongoing work and is strengthened by the recommendations from both the Independent and Charity Commission reports. 2020 GUS has developed an “Improving Safeguarding and Culture Plan” to drive its work

It aims to align our approach to safeguarding across GUS EC Committee / General Committee & all staff. It links our work on safeguarding, culture change, gender, programs and human resources, within an improved governance framework.

Adapting to a new context

In 2020 we continued to deliver to these commitments. The corona virus (COVID-19) pandemic has impacted on plans, with attention diverted to a humanitarian, programmatic and influencing response of global proportions. Garib Unnayan Sangstha (GUS) is acting fast to adapt to this new context. The outbreak has brought unprecedented changes for individuals, families and communities. The risks related to sexual exploitation and abuse are heightened in the face of stress, fear, economic uncertainty and chaotic environments. At the same time, the barriers to reporting and responding have also increased. In response, we have created a number of additional tools for staff and partners and we have been working in collaboration with interagency mechanisms to support and deliver best practice initiatives in these unique circumstance

Safeguarding strategy and policies for GUS in since 2001 to ongoing “A healthy and safe workplace is the most important and will make people stay in the long run. People prefer dignity over money”, we says

Safeguarding gender humanitarian aid program governance

What we believe

We have a vision of a just and sustainable world. A world where people and the planet are at the center of our economy. Where women and girls live free from violence and discrimination. Where the climate crisis is contained. And where governance systems are inclusive and allow for those in power to be held to account.

How we fight inequality to end poverty and injustice

The injustice of poverty demands a powerful and practical response to address both its causes and its impact on peoples' lives. Using a six-sided strategy to weave together the complex web of our efforts and joining with others, we seek to overcome poverty.

Gender justice and women's rights

Whether we are responding to an emergency, working on long terms projects with communities, or campaigning for lasting change, we tackle the inequality and deep-rooted discrimination that makes and keeps women poor.
